

M.SUPRIYA

I am on cloud nine. I was a topper in X std and now I am in the honour list again. My school with its band of teachers and my mom are the real architects behind my success. I always love to keep myself abreast with current events. So I opted for commerce stream. Naturally Commerce and Economics have drawn my focus. This passion helped me get centum in three subjects. I thank all my teachers who have groomed me to this level. The series of weekly, monthly and special revision tests conducted at school and most important of all the feed back given, enabled me to inch higher with each performance. In my opinion consistency is the key. Doing hardwork day in and day out in a focussed manner helped me achieve this success. One should not have any academic back log. Clear your doubts at each point. That's my bit of advice to my juniors. After completing my UG I aspire to do my PG in UCLA (MS in Business Analytics at University of California).

R.DHIVYA DHARSHINI

My Journey in VSRM has been a pleasant one Thanks to my Parents. I joined this institution as a tiny tot in LKG. I am happy about my academic progress. I was a topper in X Std Board Exam too. I have always felt confident whether preparing for the examinations, joining a seminar or group discussion. The one plus factor I like about VSRM is you are always encouraged to bring out the best in yourself. The practice tests scheduled at school gave me full confidence. I didn't have any panic while facing board exams. I kept myself cool and focused. I thank all the teachers who were in the journey. I wish to join one of the top colleges and ultimately join IIM.

R.KAVIYA

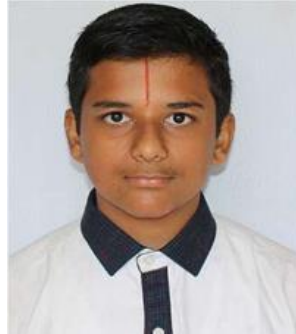

By nature I am a bit inquisitive and argumentative. My dream is to join National Law School, Bangalore. When I look back my schooling at VSRM has been smooth sailing. maintained an easy time table and dedicated 3 to 4 hours of study every day. Close to my exams of Extended my study hours for 7 to 8 hours a day. I practised of model papers and got my doubts clarified with my teachers My special thanks to all of them. My peers gave me stiff competition at school. This positive atmosphere coupled with regularity and consistency enabled me to get this success.
